

~~Chadwick's report, 1911, was the first year of his work.~~

Chadwick's work was

~~the first~~ his first publication was

of the neutron in 1932, which was a major discovery

in the history of nuclear physics and led to the development

of the atomic bomb and nuclear energy.

Chadwick's discovery of the neutron was a major contribution

to the understanding of the structure of the atom and the

development of nuclear energy.

Chadwick's work was a major contribution to the history of
